CONTENTS

Globalization of Technology: Issues in Technology Transfer and Technological Capability Building 1

Prasada Reddy, *Research Policy Institute, Lund University, Sweden*

1. Introduction
2. Dynamics of Global Business Environment
3. New Techno-economic Paradigm and Latecomer Industrialisation
4. Knowledge Networks
 - 4.1. Global intra-organizational networks
 - 4.2. Global inter-organizational networks
5. Foreign Direct Investment and Technology Transfer
6. Social Effects of Technology
7. Conclusion

Techno-Economic Paradigms and Latecomer Industrialization 24

Conceicao, Pedro, *Instituto Superior Technico, Portugal*

Heitor, Manuel V., *Instituto Superior Technico, Portugal*

1. Ideas and concepts
2. Empirics: Techno-Economic Paradigms and Country-Specific Trajectories
3. Focus on the More Recent Techno-Economic Paradigm: Information Technologies and Telecommunications
4. A "Meta" Techno-Economic Paradigm? The Emergence of Knowledge Economies and the Importance of Social Capital
5. Conclusion

Technological Leapfrogging by Developing Countries 48

Bhagavan M. R., *Stockholm Environment Institute, Stockholm, Sweden*

1. Introduction
2. The Technological Gap Between Industrialized and Developing Countries
 - 2.1. Analytical framework
 - 2.2. Differences in the Technological Levels of Countries
3. New Generic Technologies: A Class of Their Own
 - 3.1. Information and Communication Technology (ICT)
 - 3.2. Biotechnology (Biotech)
 - 3.3. New Materials Technology (NMT)
4. Major Issues Concerned With Leapfrogging
 - 4.1. Imitative Behavior and the Bandwagon Effect
 - 4.2. Income Levels and Income Distribution
 - 4.3. The Constraints of Innovation Supply and Existing Capacity
 - 4.4. Inter-technology Competition, Barriers to In-Country Diffusion and Promotion of Technology Export
 - 4.5. Attempts to Preserve Monopoly in New Innovations
 - 4.6. Absorptive Capacity and "Best Practice" Productivity
 - 4.7. The Opening Up of the International Technological Market
 - 4.8. Comparative Advantage Argument
 - 4.9. Technological Productivity in Infrastructure
 - 4.10. Leapfrogging Through "Technology Mission" Approach
5. Conclusion
 - 5.1. Indigenous Capacity
 - 5.2. Policies, Institutions and Structures
 - 5.3. Industrial and Infrastructural Branches

Biotechnology and Implications for Technological Capability Building in Developing Countries **66**

Cetindamar Dilek, *Graduate School of Management, Sabanci University, Turkey*
 Carlsson Bo, *Department of Economics, Case Western Reserve University, USA*

1. Introduction
2. Biotechnology and Developing Countries
3. Building Capability for Biotechnology
 - 3.1. Firms
 - 3.2. Institutions
 - 3.3. Networks
4. Policy Considerations

Human Resources and Work Organization in the Knowledge Economy - The Case of the Indian Software Industry **83**

Rothboeck Sandra, *International Labour Organization, New Delhi, India*

1. Introduction
2. Knowledge Economy and Organization of Production – A Theoretical framework
 - 2.1. Characteristics of Post-Fordist Organizations
 - 2.2. The Global Division of Labor
 - 2.3. The Software Production Process
3. The Case of the Software Industry in India
 - 3.1. Key Characteristics
 - 3.2. Employment Patterns
4. Conclusions

Knowledge Networks and the Internet **98**

Peter Cukor, *Fletcher School of Law and Diplomacy, Tufts University, USA*
 Lee McKnight, *Fletcher School of Law and Diplomacy, Tufts University, USA*

1. Introduction
2. Defining Knowledge Networks
3. Knowledge Networks and the Internet
4. Internet Access
5. From Knowledge Networks to Knowledge Economy Alliances
6. Knowledge Networks and Development

Inter-Firm Technology Cooperation and Implications for Capability Building **117**

Reddy Prasada, *Research Policy Institute, Lund University, Sweden*

1. Introduction
2. What is a Technology Cooperation Agreement?
 - 2.1. The General Context
3. Inter-firm Technology Cooperation Agreements – Some Empirical Analysis
4. Forms of Interfirm Technology Cooperation
5. Implications for Technological Capability Building
 - 5.1. Firm-level Implications
 - 5.2. Industry-level Implications
6. Conclusions and Policy Implications

Knowledge Networks for Meeting the Societal Demands - The University Organization in Transition **141**

Benner Mats, *Research Policy Institute, Lund University, Sweden*

1. Introduction: Research Organization in Transition
2. Research Organization, Collaboration and Funding – Theoretical Aspects
 - 2.1. Collaboration and Research Policy Changes
 - 2.2. Analytical Starting-Points
3. The Emergence of the Research Centers
4. Academic Life and Focused Programs – Two Case Studies
5. Conclusions

Science Parks and Economic Development

155

Lindholm Dahlstrand, Åsa, *Department of Industrial Dynamics, Chalmers University of Technology, Gothenburg, Sweden*

Lawton Smith, Helen, *Centre for Local Economic Development, Coventry Business School, Coventry University, UK*

1. Introduction
2. Universities, Science Parks and Regional Development
 - 2.1. Definitions
 - 2.2. Universities, Science Parks and Commercialization of the Science Base
 - 2.3. Science Parks and Regional Development
3. Objectives vs. Performance: Incubators and Managed Science Parks
4. The Swedish and British Science Park Phenomena
 - 4.1. Science Parks in the UK: Oxfordshire Science Parks
 - 4.2. Science Parks in Sweden
 - 4.2.1. The Chalmers' Science Park in Gothenburg
 - 4.2.2. Ronneby Soft Center
5. Conclusions

Technology Transfer: Vehicles, Conditions, Spillovers, and Policy Challenges

173

Koh Ai Tee, *Department of Economics, National University of Singapore, Singapore*

Shandre Thangavelu, *Department of Economics, National University of Singapore, Singapore*

1. Introduction
2. Modes of Technology Transfer and Outcomes of Successful Transfer
 - 2.1. Modes of technology transfer
 - 2.2. Conditions for Successful Transfer
 - 2.3. Spillovers from successful transfer
3. Cross-Country Study on Vehicles, Absorptive Capacity and Outcomes of Technology Transfer
4. Policy Issues and Challenges
5. Conclusion

Technology Transfer Through Foreign Direct Investment to Developing Countries - The Role of Home Country Measures

191

Girardin Groenbech, Mimi Louise, *Copenhagen Business School, Copenhagen, Denmark*

1. Introduction
2. Analytical Framework
 - 2.1. The Geographical Distribution of FDI
 - 2.2. Impact of FDI on Developing Host Countries
3. Outward Investment Promotion and Development: Empirical findings
 - 3.1. Activities
 - 3.2. Objectives
 - 3.3. Distribution of Funds
 - 3.4. Technology Transfer and Linkages
4. Discussion and Conclusion

Transfer of Cleaner Production Technologies to Transition Economies and the Role of Meso-Level Institutions: The Case of Lithuania **210**

Leonardas Rinkevicius, *Kaunas University of Technology, Lithuania*

1. Introduction
2. Establishment of Meso-Level Institutions: a Phase-wise Approach
3. Formation of the PPC in Lithuania
4. Lessons Drawn and Conclusions

The Social Implications of Technological Development: Industrialization and Innovation as a Collective Process **222**

Arni Sverrisson, *Department of Sociology, Stockholm University, Sweden*

1. Introduction
2. Technological Cultures
3. Private Sector Industrialization
4. Flexible Production in Firms and Networks
5. Gradual Diffusion and Social Continuity
6. Alternative Technology Policies

Some Questions Related to the Epistemological Purity of Science? **239**

Mammo Muchie, *Aalborg University, Aalborg, Denmark*

1. The Science Wars debate and its problems
2. Epistemological ethnocentrism of Science
3. The Perspective of Unitarian Conception of Science on Knowledge from non-western cultures
4. The Eurocentric Equation: The Greek Origin, Christianity and the West and Science
5. Continuity between Pre-modern and Modern Science

The Dynamics of Technology and Gender Roles **253**

Anna Falth Modersitzki, *UNCTAD, Geneva, Switzerland*

1. Introduction
2. Global Trends in Trade, Technology and Division of Labour
 - 2.1. Liberalization and global restructuring
 - 2.2. Changes in technology
 - 2.3. Organization of production
 - 2.4. Knowledge and learning processes
 - 2.5. Integration or exploitation of women?
3. Selected Sectors
 - 3.1. Textile and garment industry
 - 3.2. Agriculture
 - 3.3. Biotechnology
 - 3.4. Entrepreneurship
 - 3.5. Household technologies
4. Conclusion
