

CONTENTS

ENERGY POLICY

Energy Policy Volume 1

e-ISBN: 978-1-905839-33-9

ISBN : 978-1-84826-933-0

No. of Pages: 422

For more information of e-book and Print Volume(s) order, [please click here](#)

CONTENTS

Energy Policy

1

Anthony D. Owen, *University of New South Wales, Australia*

1. Introduction: An Historical Review
2. Global Energy Markets
3. What is Energy Policy?
4. Energy Planning, Policy Instruments, and Constraints
 - 4.1. Energy Policy Objectives
 - 4.1.1. Security of Supply
 - 4.1.2. Oil Import Dependence
 - 4.1.3. Diversification of Supplies
 - 4.2. Policy Instruments
 - 4.2.1. Energy Tax Policies
 - 4.3. Energy Use and Human Activity
5. Social Costs of Energy Use
6. Energy Policy and Natural Monopolies: The Electricity Industry
7. Energy Policy and the Environment
 - 7.1. Energy Taxes or Regulation to Achieve Environmental Policy Goals?
 - 7.2. Energy Taxes or Tradable Emission Permits?
 - 7.3. The Environment and Nuclear Power
8. The Economic Effects of Energy Taxes
 - 8.1. Efficiency Effects
 - 8.2. Distributional Effects
 - 8.3. Macroeconomic Effects
9. Policy for Renewable Energy Technologies
 - 9.1. Development of Renewable Energy Technologies
 - 9.2. The Evolution of Renewable Energy Technologies
 - 9.3. Promotion of Renewable Electricity Technologies
 - 9.4. Policies to Encourage Renewable Energy Technologies in Electricity Production
 - 9.5. Assessment of Different Renewable Energy Policies
10. Energy Conservation and Energy Efficiency
 - 10.1. Transportation
 - 10.1.1. Less Energy-Intensive Modes
 - 10.1.2. Improved Technical Efficiency
 - 10.1.3. Behavioral Changes
 - 10.2. Households
 - 10.2.1. Behavioral Changes
 - 10.2.2. Improved Energy-Use Equipment
 - 10.2.3. Architectural Improvements
 - 10.3. Industry
11. Policies for Sustainable Energy Supply

Energy Security: Past Accomplishments, Emerging Challenges

33

J. Bielecki, *Energy Charter Secretariat, Brussels, Belgium, rance*

1. Introduction
2. Evolution of the Oil Markets
 - 2.1. The Period of 1960–1973
 - 2.2. The Period of 1973–1986
 - 2.3. The Period of 1986–2000
3. Institutional Security Framework
4. Current State of Oil Security
 - 4.1. Traditional Security Concerns
 - 4.2. New Security Concerns

5. Future Oil Security Needs
6. Strategic Initiatives to Enhance Security
7. Impact on Sustainable Development

Energy Resources Assessment

50

Anthony D. Owen, *University of New South Wales, Australia*

1. Introduction
2. World Energy Reserves and Resources: Summary
3. Oil
 - 3.1. Oil reserves
 - 3.2. Oil Resource Outlook
 - 3.3. Non-Conventional Oil Resources
4. Natural Gas
5. Coal
6. Uranium
 - 6.1. Uranium Resources: Definitions
 - 6.2. Uranium Resource Estimates
 - 6.3. Non-Conventional Sources of Uranium Supply
7. Renewable Energy Resources
 - 7.1. Hydropower
 - 7.2. Wind
 - 7.3. Solar
 - 7.3.1. Solar Photovoltaics
 - 7.3.2. Solar Thermal
 - 7.3.3. Low Temperature Solar Thermal
 - 7.4. Biomass
 - 7.4.1. Agricultural Crops
 - 7.4.2. Agricultural Residues
 - 7.4.3. Animal Waste
 - 7.4.4. Black Liquor
 - 7.4.5. Bagasse - Sugar Cane Waste
 - 7.4.6. Forestry Crops
 - 7.4.7. Forestry Residues
 - 7.4.8. Industrial Waste
 - 7.4.9. Municipal Solid Waste (MSW)
 - 7.4.10. Sewage
 - 7.5. Marine
 - 7.5.1. Tidal Power
 - 7.5.2. Wave Power
 - 7.6. Geothermal
 - 7.7. Non-Commercial

Energy Demand and Supply Elasticities

72

Carol Dahl, *Colorado School of Mines, USA*

1. Introduction
2. Competitive Markets
3. Supply Functions
4. Supply Elasticities
5. Using Elasticities to Forecast Supply
6. Energy Demand
7. Energy Demand Elasticities
8. Effect of Supply Disruption on Energy Prices
9. Demand Elasticities—Elastic Versus Inelastic
10. Forecasting with Demand Elasticities

11. Effect of Energy Environmental Taxes
12. Creating Demand Functions from Elasticities
13. Incidence of Energy Taxes and Subsidies
14. Elasticities and Monopolies
15. Conclusions

Projecting Energy Trends into the 21th Century **95**

Hillard G. Huntington, *Stanford University, USA*

Mark Rodekoeh, *US Energy Information Administration, USA*

1. Introduction
2. Energy-Evaluation Systems
3. The World Energy Projection System (WEPS)
4. Energy Consumption Projections
5. Fuel Shares Projections
6. Oil Price Projections
7. Past Forecasting Errors
8. Beyond Numbers

Energy Markets and Pricing Policies **110**

B. S. Fisher, *Australian Bureau of Agricultural and Resource Economics, Australia*

M. D. Hinchy, *Australian Bureau of Agricultural and Resource Economics, Australia*

1. Introduction
2. Oil
3. Coal
4. Electricity
5. Conclusions

Economic Instruments **126**

Anthony D. Owen, *University of New South Wales, Australia*

1. Introduction
2. Internalizing Externalities
3. Economics of Emission Control
4. The Taxation Approach
5. Applications
6. Tradable Permits
 - 6.1. Example: How Tradable Permits Minimise Abatement Costs
 - 6.2. Creating a Market for Tradable Permits
7. Types of Tradable Emission Permits
8. Combined Taxes and Permits
9. Applications
 - 9.1. US Clean Air Act
 - 9.2. Applications in Local Fisheries
10. Efficiency of Economic Instruments
11. Social Welfare Aspects of Economic Instruments
12. Practical Experience

Energy-Economy Interactions **149**

Anthony D. Owen, *University of New South Wales, Australia*

1. Introduction
2. Historical Perspective

3. Energy Use and Economic Structure
 - 3.1. Energy Intensity and Energy Indicators
 - 3.2. Structural Components and Their Importance
 - 3.3. Extremes of Energy Use
4. Energy Prices
5. Developing Countries
6. Energy Outlook
7. Conclusions

Energy Planning and Management: Methodologies and Tools

162

M. K. Jaccard, Simon Fraser University, Canada

1. Introduction: the Context and Rationale of Energy Planning and Management
2. Energy Supply Planning and Management: Methodologies and Tools
 - 2.1. Planning for Energy Mineral Exploration and Development
 - 2.2. Estimating Energy Resources and Technology Assessment
 - 2.3. Optimization Techniques for Multi-Product Energy Supplies and Complex Facilities
 - 2.4. Optimization Techniques for Total Energy System Planning
 - 2.5. Managing and Coordinating Competitive Suppliers in Monopoly Delivery Systems
3. Energy Demand Planning and Management: Methodologies and Tools
 - 3.1. The Evolution of Energy Demand Forecasting
 - 3.2. Demand-Side Management
 - 3.3. Integrated Resource Planning by Energy Utilities
 - 3.4. Wider Applications of the Concepts of Integrated Resource Planning
4. Conclusion: Future Directions

Government Energy Policy in a Global Context

185

Linda Doman, United States Department of Energy, USA

1. Introduction
2. How Effective are Government Energy Policies?
3. Government Energy Policies
 - 3.1. Energy Subsidies
 - 3.2. Government Regulatory Legislation
 - 3.3. Taxation
 - 3.4. Public Works Projects
 - 3.5. Sanctions
4. Conclusions

Energy Policy and Economic Development: Challenges and Responses

198

Joy Dunkerley, Independent Energy Consultant, USA

1. Introduction: Energy and Economic Development
2. Evolving Energy Policies in Developing Countries
3. The Energy Supply Sectors
 - 3.1. Oil
 - 3.2. Gas
 - 3.3. Coal
4. Electricity
5. Energy Efficiency
6. The Issue of "Access"
 - 6.1. The Urban Poor
 - 6.2. Rural Energy Supplies
 - 6.2.1. Traditional Biomass Fuels
 - 6.2.2. New Forms of Biomass Fuels

- 6.2.3. Provision of Commercial Fuels: Rural Electrification
7. Conclusion

Energy Efficiency and Energy Policy

218

Fereidoon P. Sioshansi, *Menlo Energy Economics, USA*

1. Introduction
2. Why Energy Efficiency Matters
3. The Electricity Supply Industry (ESI)
 - 3.1. Energy Conservation and Energy Efficiency in the ESI
 - 3.2. Definitions: Energy Conservation, Energy Efficiency, Conservation and Load Management (CLM), and Demand-Side Management (DSM)
4. A Brief History of Energy Conservation in North America
5. The Birth of Incentivized Energy Conservation Programs
6. What is the Potential for Energy Conservation?
7. Market Failure and Energy Efficiency Standards
8. How Much Energy Conservation is too Much?
9. Cost-Effectiveness of Energy Conservation Efforts
10. Policy and Regulatory Options
 - 10.1. Command and Control Regulations
 - 10.1.1. Mandatory Programs and/or Expenditure Levels
 - 10.1.2. Standards
 - 10.1.3. Appliance Labeling
 - 10.2. Consumer Education and Awareness
 - 10.3. Incentivized Programs
11. The Demise of Regulatory-Driven Energy Conservation
12. Market Transformation: The Latest Panacea
13. New Policies for the Restructured Business Environment
14. Conclusions: Policy Options for Enlightened Decision Makers

The Changing Role of Fuel Switching: Implications for Energy Policy and Analysis

243

P. Söderholm, *Luleå University of Technology, Sweden*

1. Introduction
2. The Fundamentals of Fuel Switching in Power Generation
 - 2.1. The Choice between New Power Plant Capacities
 - 2.2. The Choice between New and Existing Power Capacity
 - 2.3. Fuel Switching within Existing Capacity
 - 2.4. Summarizing Remarks
3. The Changing Role of Fuel Switching: A Brief History
 - 3.1. From Stable Markets to Energy Crises
 - 3.2. Increasing Problems for New Capacity Developments
 - 3.3. Deregulation, Environmental Concerns and the Advent of CCGT
 - 3.4. The New Role of Fuel Switching
4. Fuel Switching in the Literature and Directions for Future Research
 - 4.1. Previous Research Efforts: Lessons and Caveats
 - 4.2. The Real Options Approach to Power Generation Fuel Choice
5. Energy Policy and Fuel Switching
6. Concluding Remarks

Strategies for the Adoption of Renewable Energy Technologies

266

M. E. Watt, *University of New South Wales, Australia*

H. R. Outhred, *University of New South Wales, Australia*

1. Introduction

2. Background
 - 2.1. United Nations Framework Convention on Climate Change (FCCC)
 - 2.2. The Role of Renewables
3. Electricity Industry Restructuring
 - 3.1. Aims of Restructuring
 - 3.2. Current Impacts of Restructuring on Renewable Energy
 - 3.2.1. Electricity Prices
 - 3.2.2. Network Services
4. Market Impediments Facing Renewables
5. Current International Drivers for Renewables
 - 5.1. Greenhouse Gas Reduction Strategies
 - 5.2. Clean Air Requirements
 - 5.3. Competitive Energy Markets
 - 5.4. Employment and Industry Development
 - 5.5. Energy Supply Security
6. Successful Strategies
 - 6.1. Renewable Energy Targets and Portfolio Standards
 - 6.2. Competitive Bidding
 - 6.3. Emissions Targets and Trading Schemes
 - 6.4. Emissions Taxes or Price Mechanisms
 - 6.5. Least Cost Outcomes for Energy Service Providers
 - 6.6. Capital Cost Subsidies
 - 6.7. Tariffs
 - 6.8. Net Metering
 - 6.9. Encouraging Distributed Generation
 - 6.10. Government Purchase
 - 6.11. Research
 - 6.12. Demonstration
 - 6.13. Commercialization
 - 6.14. System Transaction Charges
 - 6.15. Tax Incentives
 - 6.16. Green Power
 - 6.17. Public Disclosure of Fuel Mix Details
 - 6.18. New Business Opportunities for Utilities
 - 6.19. Corporate Image
 - 6.20. Information
 - 6.21. Education, Training and Standards
7. Trends and Unresolved Issues
8. Requirements for Successful Transition to Renewables Based Energy Systems
 - 8.1. Electricity Industry Restructuring
 - 8.2. Market Access
 - 8.3. Equity
 - 8.4. Price
 - 8.5. Technology Diversity
 - 8.6. Market Acceptance

The Role of Nuclear Energy in World Energy Policies

291

Stephen W. Kidd, *World Nuclear Association, formerly the Uranium Institute, UK*

1. Introduction
2. Some History
3. Nuclear Power Today
4. Some Arguments Pro and Con
 - 4.1. Economics
 - 4.2. Radiation
 - 4.3. Plant Safety
 - 4.4. Spent Fuel Management and Waste

- 4.5. Proliferation of Nuclear Weapons
- 4.6. Transport of Nuclear Materials
- 4.7. Global Warming
- 4.8. Sustainable Development
- 4.9. Balanced Energy Strategies
- 4.10. Security of Supply
- 5. Scenarios for the Future
 - 5.1. Reference Case
 - 5.2. Upper Case
 - 5.3. Lower Case
- 6. Conclusions

The Switch to Less Energy-Intensive Industry

306

Hisao Kibune, *Nagoya Gakuin University, Japan*

- 1. Introduction
- 2. Economic Development and Energy Input
 - 2.1. Energy Intensity per GDP
 - 2.1.1. Energy Intensity
 - 2.1.2. Comparison of GDP Energy Intensity among Countries
 - 2.1.3. Energy Intensity in Time Series
 - 2.2. Energy as a Production Factor
 - 2.2.1. Production Function and Complementation and Substitution
 - 2.2.2. Iso-Product Curve and Energy Intensity
- 3. Structural Analysis for Energy Intensity
 - 3.1. Factors Contributing to Low Energy Structures
 - 3.2. Energy Saving in a Factory
 - 3.3. Energy Saving Measures in a Factory
 - 3.3.1. Energy Saving Measures by Steps
 - 3.3.2. First Step: Enhancement of Management of Operation and Maintenance
 - 3.3.3. Second Step: Improvement of Equipment and Facilities
 - 3.3.4. Third Step: Amelioration of Manufacturing Processes
 - 3.4. Energy Saving Means in a Whole Industry
 - 3.4.1. Product Mixture and Industrial Structure
 - 3.4.2. Factor Analysis of Energy Intensity Change in Japan
- 4. Policy for Low Energy Consumption Economy
 - 4.1. Role of Energy Conservation Policies
 - 4.2. Classification and Contents of Energy Conservation Policies
 - 4.2.1. Classification of Policies
 - 4.2.2. Information Provision
 - 4.2.3. Using Price Systems
 - 4.2.4. Mandatory Orders
 - 4.2.5. Encouraging Research and Development
 - 4.3. Advancing Industrial Structures
 - 4.4. Environment Policy and Energy Saving
- 5. Conclusion

Impacts of Energy Taxes and Subsidies

326

B. S. Fisher, *Australian Bureau of Agricultural and Resource Economics, Australia*

M.D.Hinchy, *Australian Bureau of Agricultural and Resource Economics, Australia*

- 1. Introduction
- 2. Taxes on Fossil Fuels
 - 2.1. Theory
 - 2.2. Existing Taxes on Fossil Fuels
- 3. Fossil Fuel Subsidies

- 3.1. Methodology
- 3.2. Estimates of the Size of Fossil Fuel Subsidies
- 3.3. General Equilibrium Analysis
- 4. Alternative Policies
- 5. Conclusions

Impacts of Carbon Taxes

341

B. S. Fisher, *Australian Bureau of Agricultural and Resource Economics, Australia*
M. D. Hinchy, *Australian Bureau of Agricultural and Resource Economics, Australia*

- 1. Introduction
- 2. The Theory of Carbon Taxes
- 3. Economy Level Studies
- 4. International Repercussions
 - 4.1. Annex B Impacts
 - 4.2. Non-Annex B Impacts
 - 4.3. Emission Leakage
- 5. International Tax Harmonization
 - 5.1. Uniform Taxes and Emissions Trading
 - 5.2. Different Domestic Policy Instruments
- 6. Modifications to Standard Assumptions
 - 6.1. The Induced Innovations Hypothesis
 - 6.2. OPEC Response
 - 6.3. Displacing Other Taxes
 - 6.4. Point of Levying the Tax
- 7. Conclusion
