

CONTENTS

ENVIRONMENT AND DEVELOPMENT

Environment and Development - Volume 1

No. of Pages: 418

ISBN: 978-1-84826-270-6 (eBook)

ISBN: 978-1-84826-720-6 (Print Volume)

Environment and Development - Volume 2

No. of Pages: 422

ISBN: 978-1-84826-271-3 (eBook)

ISBN: 978-1-84826-721-3 (Print Volume)

CONTENTS

VOLUME I

Environment and Development **1**

Aiguo Lu, *Institute of World Economics and Politics, Chinese Academy of Social Sciences (CASS), People's Republic of China*

1. Changing Perceptions
 - 1.1. The Environment and the Concept of "Sustainable Development"
 - 1.2. Different Approaches to Sustainable Development
2. Agendas and Actions for Environment Protection and Sustainable Development
 - 2.1. International and Inter-Government Agendas
 - 2.2. National Actions
3. Challenges to Sustainable Development
 - 3.1. Development Inequalities Between South and North
 - 3.2. The Environment and International Trade, Debt, and Aid
 - 3.3. Population Growth, Poverty, and Carrying Capacity
 - 3.4. Assessment and Management
 - 3.5. Implications for Sovereignty
4. Outlook for the Future
 - 4.1. Development, Sustainability, and Equity
 - 4.2. Elements of Sustainable Development
 - 4.2.1. People-Centered Development
 - 4.2.2. The Right to Develop
 - 4.2.3. Environmental Protection
 - 4.2.4. Social Justice
 - 4.3. Global, Regional, National, and Local Links

Approaching Sustainable Development from Different Angles **29**

Kunmin Zhang, *Ritsumeikan Asia Pacific University, Japan*

Jiantao Zheng, *Energy Division of Institute of Nuclear and Energy Technology (INET), Tsinghua University, People's Republic of China*

1. Introduction
2. A Historical Perspective
3. Human Activities and Global Environmental Changes
 - 3.1. The Changing Atmosphere
 - 3.2. Changes in Land Use
 - 3.3. Loss of Biological Diversity
4. General Ideas about Sustainable Development
5. An Economics Approach
6. A Biogeochemical Approach
7. A Sociocultural Approach
8. International Cooperation
 - 8.1. Regional and Global Alliance
 - 8.2. The 1992 Earth Summit
9. Principles of Sustainable Development
 - 9.1. Ecological Principles of Sustainable Development
 - 9.1.1. Dependence
 - 9.1.2. Biophysical Limits
 - 9.1.3. Living Within the Carrying Capacity of the Environment
 - 9.1.4. Interdependence
 - 9.2. Social/Ethical Principles of Sustainable Development
 - 9.2.1. Intergenerational Equity
 - 9.2.2. Intra-generational Equity

- 9.2.3. Ecological Justice
- 9.3. Political Principles of Sustainable Development
 - 9.3.1. Participation
 - 9.3.2. Cooperation
 - 9.3.3. Addressing the Root Causes
- 10. Conclusion

Scientific Justification for Environmental and Ecological Sustainable Development 57
Jun Peng, *State Environmental Protection Administration, Beijing, People's Republic of China*

- 1. Introduction
- 2. Technology and Energy Systems of the Future
- 3. Defining the Environmental Threats
- 4. Biospheric Stability
- 5. Efficient Energy Use
- 6. Biotechnology
- 7. Productivity
- 8. A Sustainable Energy System

Biological and Biogeochemical Approaches to Environmental and Ecological Sustainable Development 69
Jiufang Lu, *Department of Chemical Engineering, Tsinghua University, Beijing, People's Republic of China*

- 1. Introduction
- 2. The Water Cycle
- 3. The Carbon Cycle
- 4. The Nitrogen Cycle
- 5. The Phosphorus Cycle
- 6. The Sulfur Cycle

Environmental, Economic, and Ecological Sustainable Development 80
Bingzhang Xue, *Energy and Global Change, ABB Corporate Research Ltd, Baden, Switzerland*

- 1. Sustainable Development
- 2. Trends
 - 2.1. Population
 - 2.2. Energy
 - 2.3. Greenhouse Gases
- 3. Ecology
- 4. Environment and Economics
- 5. Economic Instruments
- 6. Social Instruments
- 7. Role of Government
- 8. Industry's Role
- 9. Multicriteria Analysis

Social Aspects of Environmental and Ecological Sustainable Development 90
Deming Zhou, *Development Research Academy for 21st Century, Tsinghua University, Beijing, People's Republic of China, China*
Yong Han, *Energy Division of Institute of Nuclear and Energy Technology (INET), Tsinghua University, Beijing, People's Republic of China*

- 1. Introduction

2. Population Pressure
 - 2.1. Case Study: China's Family Planning
3. Poverty
 - 3.1. Case Study: Poverty and Deforestation
4. Education
 - 4.1. Case Study: Green Schools Plan
5. National Policy and Legislation
6. People's Consumption Patterns
7. Public Awareness and Participation
8. Conclusions

International Coordination of Scientific Efforts in Support of Environmental and Ecological Sustainable Development **105**

Can Wang, *Department of Environmental Science and Engineering, Tsinghua University, China*
Kunmin Zhang, *Ritsumeikan Asia Pacific University, Japan*

1. Introduction
2. The Background to International Scientific Coordination on Environment Protection
3. International Scientific Coordination on Environmental and Ecological Sustainable Development
 - 3.1. Several Major International Organizations
 - 3.1.1. The United Nations Environment Programme
 - 3.1.2. The World Meteorological Organization
 - 3.1.3. United Nations Educational, Scientific and Cultural Organization
 - 3.1.4. Global Environment Facility
 - 3.1.5. The International Union for Conservation of Nature and Natural Resources
 - 3.1.6. The Scientific Committee on Problems of the Environment
 - 3.1.7. Consultative Group on International Agricultural Research
 - 3.1.8. International Institute for Applied Systems Analysis
 - 3.2. Major International Cooperation Programs
 - 3.2.1. International Geosphere-Biosphere Programme
 - 3.2.2. Man and the Biosphere Program
 - 3.2.3. The World Climate Research Programme
 - 3.2.4. The World Weather Watch
4. Looking to the Future

Multidisciplinary Approaches to New Pathways to Sustainable Development **132**

Xueyang He, *Department of Environmental Science and Engineering, Tsinghua University, Beijing, People's Republic of China*
Kunmin Zhang, *Ritsumeikan Asia Pacific University, Japan*

1. Introduction
2. The Ecology and Sustainable Development
3. Economics and Sustainable Development
4. The Social Aspects of Sustainable Development
5. Technology and Sustainable Development
6. Indicators
7. Conclusion

Hazard and Risk Assessment, and Risk Management **143**

Yaping Du, *Institute of World Economics and Politics, Chinese Academy of Social Sciences, People's Republic of China*
Jiahua Pan, *Research Centre for Urban and Environmental Studies, Chinese Academy of Social Sciences, People's Republic of China*

1. Overview of Assessment and Management of Hazard and Risk

- 1.1. Ecological Risk Assessment
- 1.2. Hazard and Ecological Risk Assessment
- 1.3. Risk Management
- 1.4. Organizational Structure
2. Scientific Knowledge Needed to Assess Ecological Risks
 - 2.1. Complexity of Ecological Risk Assessment
 - 2.2. Conceptual Models
 - 2.3. Framework for Ecological Assessment
 - 2.4. Retrospective Assessment
 - 2.5. Predictive Assessment
 - 2.6. Construction of Scientific Database
 - 2.7. Stressors
 - 2.8. Media
 - 2.9. Time Considerations
 - 2.10. Spatial Features
 - 2.11. Biological and Ecological Levels
 - 2.12. Socioeconomic Characteristics
 - 2.13. Uncertainties and Constraints
3. Hazardous Wastes and Other Substances Causing Risk Concerns
 - 3.1. Hazardous Wastes
 - 3.2. Industrial and Mining Wastes
 - 3.2.1. Industrial Sources
 - 3.3. Air Pollutants
 - 3.4. Radioactive Waste
 - 3.5. Urban Solid Waste
 - 3.5.1. Municipal Refuse
 - 3.6. Sewage
 - 3.7. Agriculture
 - 3.8. Introduction of Non-Indigenous Species
 - 3.9. Genetically Modified Organisms
4. Criteria for Estimating Ecological Risk
 - 4.1. Multidimensional Nature for Criterion Setting
 - 4.2. Weak versus Strong Sustainability Criterion
 - 4.3. Critical Levels
 - 4.4. Endpoint Criteria
 - 4.5. Combination of Criteria
 - 4.6. Tiered Risk Assessment
 - 4.6.1. Different "Tiers"
 - 4.6.2. Derivation of the Quotient
 - 4.7. Accident Risk Assessment
 - 4.8. Use of Hazards Indexation System
5. Environmental Protection and Risk Management: Principles and Policy
 - 5.1. Sustainability Principles
 - 5.2. Efficiency Principles
 - 5.3. Equity Principles
 - 5.4. Institutional Instruments
 - 5.5. Integrated Environmental and Risk Management
 - 5.5.1. Economic Instruments
 - 5.5.2. Research and Development
 - 5.5.3. Integration of Measures
 - 5.5.4. International Cooperation

Current Views of Global Carrying Capacity

189

Jisong Wu, *Director General, Department of Water Resources, Ministry of Water Resources, People's Republic of China*

1. Current Views of Global Carrying Capacity

2. The Global Social, Economic, and Cultural Situation
 - 2.1. Economic Differences
 - 2.2. Cultural Differences
 - 2.3. A Comparison of Production and Consumption between Developed and Developing Countries
3. Carrying Capacity of Natural Resources
4. The Environment, Environmental Problems, and Environmental Protection
5. Population, Resources, and Environment
6. Sustainable Development and Global Carrying Capacity

Social and Economic Disparities

231

Yifan Ding, *Institute of World Development, Development Research Center of State Council, People's Republic of China*

1. Introduction
2. Growth and Equity
3. Social Disparity and Environmental Degradation
4. Globalization and Inequality
5. Skills and Income Inequality
6. Gender Discrimination and Inequality
7. Corruption is Aggravating Social Disparities
8. Policy Responses to Social Disparities

The International Poverty Trap

252

Yifan Ding, *Institute of World Development, Development Research Center of State Council, People's Republic of China*

1. Introduction
2. Structuralist and Neo-Marxist Explanations of Poverty
3. Human Capital and Knowledge as Determinants of Development
4. International Aid

Impacts of Poverty and an Inability to Manage the Environment

267

Yifan Ding, *Institute of World Development, Development Research Center of State Council, People's Republic of China*

1. Introduction
2. The Poor: Victims and Agents of Environmental Degradation
3. Is Environmental Degradation Inherent in Poverty?
4. Policy Failure and Market Failure
5. Other Factors in the Poverty–Environment Link
6. Attempts to Alleviate Poverty, Thus Relieving Pressure on the Environment

Impact of Affluence and Overexploitation of Natural Resources

285

Yifan Ding, *Institute of World Development, Development Research Center of State Council, People's Republic of China*

1. Introduction
2. Human Activities and Loss of Biodiversity
3. Destruction of Natural Resources in the Name of Development?
4. Grow Now and Clean Up Later
5. Can Privatization Miraculously Save the Situation?
6. Institutional Weakness of Developing Countries' Management of Natural Resource Exploitation
7. Using Economic Instruments To Protect the Environment
8. Payment for Access to Genetic Resources

9. Promoting Sustainable Development

Mechanisms for Improving Economic and Industrial Growth in Developing Countries 305

Yifan Ding, *Institute of World Development, Development Research Center of State Council, People's Republic of China*

1. Introduction
2. Linear Growth Model and Stages of Development
3. The Money of the Rich May Bring Luck to the Poor
4. Relying On One's Own Strength or Borrowing a Hen To Have Its Eggs
5. Technological Progress and Human Capital

Responses to the Challenges of Disparities and Unsustainable Use of Natural Resources 321

Ying Chen, *Institute of World Economics and Politics, Chinese Academy of Social Sciences, People's Republic of China*

1. Global Crises: Natural and Social
 - 1.1. Relationships between Human Society and the Environment
 - 1.2. Natural Crisis: Unsustainable Resources Use
 - 1.2.1. Definition and Characteristics of Natural Resources
 - 1.2.2. Unsustainable Resource Use
 - 1.3. Social Crisis: Increasing Disparities
2. Relationships between Unsustainable Resources Use and Disparities
 - 2.1. The Story of the Poor
 - 2.2. The Story of the Rich
3. Technological Responses
 - 3.1. Overall Strategies for Rational Resource Use
 - 3.2. Improvement of By-product Recovery, Recycling, and Reuse, and Raw Materials Use Reduction, Replacement, and Recycling
 - 3.3. National and Enterprise Innovation Systems
 - 3.4. Needs and Progress of Indicators Development
4. Social and Economic Responses
 - 4.1. Taxation and Other Economic Incentives and Disincentives
 - 4.2. Changing Public Attitudes and Perceptions and Improving Education and Public Awareness

Strategies for Rational Use of Natural Resources 335

Tong Qiu, *Department of Chemical Engineering, Tsinghua University, Beijing, People's Republic of China*

1. Urgency
 - 1.1. Exploitation and Depletion of Resources
 - 1.2. The Present Efficient Use of Some Resources
2. Feasibility
 - 2.1. New Energy Sources and Sustainable, Clean Use of Energy
 - 2.2. Energy Use Efficiency and Energy-Saving Technology
 - 2.3. Overcoming the Shortage of Raw Materials
 - 2.4. Changing Waste into Wealth
 - 2.5. Transition to Ecological Agriculture
3. Strategic Policy
 - 3.1. Scientific and Technological Progress
 - 3.2. Reasonable and Appropriate Policies and Rules
 - 3.3. Sound Market Measures
 - 3.4. Public Participation

Index 351

About EOLSS 359

VOLUME II

Improved By-Product Recovery, Recycling, and Reuse 1
 Tong Qiu, *Department of Chemical Engineering, Tsinghua University, Beijing, People's Republic of China*

1. The Environment and By-Products and Wastes
2. Cyclic Use of By-Products and Wastes
3. The Recovery of By-Products and Wastes
 - 3.1. Utilization of By-Products
 - 3.2. Reclamation, Renewal, and Re-Utilization of Wastes and Used Products
 - 3.3. Cyclic Utilization of Solid Wastes
4. Clean Production
5. From Clean Production to Industrial Ecology

Development of Early Warning Systems to Alert Governments to Major Changes in Resource Use 15
 Ying Chen, *Institute of World Economics and Politics, Chinese Academy of Social Sciences, People's Republic of China*

1. Categories of Resources
2. Market Failure: When the Invisible Hand Doesn't Work
 - 2.1. No Market, Thin Market, or Market with Imperfect Competition
 - 2.2. Imperfect Information
 - 2.3. Public Goods
 - 2.4. Externalities
3. Government Failure
 - 3.1. Potential Threats of Government Failure
 - 3.2. Three Levels of Government Failure
 - 3.2.1. Project Policy Failure
 - 3.2.2. Sectoral Policy Failure
 - 3.2.3. Macroeconomic Policy Failure
4. Making Environmental Data Useful for Policy Makers
5. International Progress in Development of Indicators of Environmentally Sustainable Development
 - 5.1. Organisation for Economic Co-operation and Development Indicators Program
 - 5.2. Commission for Sustainable Development Indicators Program
 - 5.3. Environmental Indicator Sets of Nordic Countries
 - 5.4. Greening National Accounts
 - 5.5. Weak Sustainability Indicator
 - 5.6. World Bank's Indicators of Genuine Saving and Wealth of Nations

Raw Materials Use Reduction, Replacement, and Recycling 27
 Tong Qiu, *Department of Chemical Engineering, Tsinghua University, Beijing, People's Republic of China*

1. The Direction of Development—Ecomaterials
2. Life-Cycle Assessment
 - 2.1. Life-Cycle Engineering Design
3. Raw Material Substitutes and Conservation
 - 3.1. The Place of Science and Technology

- 3.2. Developing Clean Technology
- 3.3. Replacing Non-Renewable Resources with Renewable Resources
- 3.4. Material Re-production
- 3.5. Substitutes for Raw Materials

Capacity for Developing Innovative Production Technologies

38

Ying Chen, *Institute of World Economics and Politics, Chinese Academy of Social Sciences, People's Republic of China*

- 1. Finite, Infinite, and Sustainability of Resources
 - 1.1. Two Sides of the Coin: Finiteness and Infiniteness
 - 1.2. Sustainability Is What Really Matters
- 2. Contributions of Technological Innovation to Sustainable Development
 - 2.1. How Can Technological Innovation Contribute?
 - 2.2. The Concept of Technological Innovation and Expanding It
 - 2.3. Interactions between Scientific Advances and Technological Innovation
- 3. General Theory of Technological Innovation
 - 3.1. New Disequilibrium of Resources Allocation Caused by Technological Innovation
 - 3.1.1. Resource Supply
 - 3.1.2. Resource Demand
 - 3.2. New Equilibrium of Resources Allocation Caused by Technological Innovation
- 4. Institutional Analysis of Systems of Technological Innovation
 - 4.1. National Innovation Systems
 - 4.1.1. General Description
 - 4.1.2. Establishing National Innovation Systems in Developing Countries
 - 4.2. Enterprise Innovation Systems
 - 4.2.1. General Description
 - 4.2.2. Establishing Enterprise Innovation Systems in Developing Countries

Narrowing Disparities Using Taxation and Other Economic Incentives and Disincentives

50

Ying Chen, *Institute of World Economics and Politics, Chinese Academy of Social Sciences, People's Republic of China*

- 1. Increasing Economic and Social Disparity
- 2. Globalization, Disparities, and Sustainability
- 3. Overview of Economic Policies for Narrowing Disparities
 - 3.1. Taxation
 - 3.2. Social Expenditure
 - 3.3. Labor Market Policy
 - 3.4. Monetary Policy and Macroeconomic Policy
 - 3.5. Institutional Systems
- 4. Obstacles for Governments to Overcome
- 5. Global Efforts for Poverty Reduction: World Bank Strategic Shifts
 - 5.1. International Development Goals
 - 5.2. The World Bank's Two Strategic Shifts
 - 5.3. Does Foreign Aid Help Reduce Poverty?
- 6. Microcredit Programs: Successful Economic Incentives for Poverty Reduction
 - 6.1. The Purpose of Microcredit Programs
 - 6.2. Experience in Bangladesh
 - 6.3. Global Development of Microcredit Programs
 - 6.4. Outcomes of Microcredit Programs
 - 6.5. Limitations of Microcredit Programs

Minimizing Disparities By Changing Public Attitudes And Perceptions, And By Improving Education And Public Awareness 63

Ying Chen, *Institute of World Economics and Politics, Chinese Academy of Social Sciences, People's Republic of China*

1. Changing Perceptions of Poverty
 - 1.1. Human Development Index
 - 1.2. Human Poverty Index
 - 1.3. The Implications of the Human Poverty Index
2. Exploration of Human Resources and Economic Development
 - 2.1. Human Resources in the Wealth of Nations
 - 2.2. Solow Residual
 - 2.3. Empirical Evidence
3. Improving Education in Developing Countries
 - 3.1. Education Problems in Developing Countries
 - 3.2. Strategies for Improving Education in Developing Countries
 - 3.2.1. Goals of Reform
 - 3.2.2. Basic Education
 - 3.2.3. Tertiary Education
 - 3.2.4. Vocational Training and Learning By Doing
 - 3.2.5. The Role of Government and the Private Sector in Education Investment
 - 3.2.6. Improving Policies Outside the Education System
4. Other Impacts of Improving Education
5. Creating Brighter Future with Sustainable Development
 - 5.1. Over Consumption in Developed Countries
 - 5.2. Arguments from the Developed and the Developing Nations
 - 5.3. Promoting International Cooperation for a Brighter Future

Environmental Economics and Ecobusiness 78

Ichiro Kaneda, *Niigata Sangyo University, Japan*

1. Economics and the Environment
2. The Limits of Conventional Accounting
3. The Necessity for a System of Environmental Accounting
4. The System of Integrated Environmental and Economic Accounting
5. The System of Integrated Environmental and Economic Accounting and the Conventional System of National Accounts
6. Defending Against the Depletion and Degradation of the Environment
7. Enterprise and Household Activities in the System of Integrated Environmental and Economic Accounting
8. The Environment as Stock
9. Change in Volume of Natural Assets
10. Valuation of Natural Assets and Welfare Economics
11. More Discussion on Change in Volume of Non-Produced Natural Assets
12. The Method of Valuation of Natural Assets or Natural Resources
13. The Valuation of Natural Productivity in Natural Assets
14. The Valuation of Natural Asset Elements in Accounting and the Development of Ecobusiness
15. Natural Assets Valuation, Optimal Resource Allocation, and Maximization of Social Welfare
16. Externalization of Pollutant Materials Disposal
17. Administrative Regulation and Taxation
18. Life-Cycle Assessment

Conceptual Issues Including Environmental, Natural Resources, And Ecological Accounting 112

Ichiro Kaneda, *Niigata Sangyo University, Japan*

1. Sustainable Relations between Economic Activities and the Environment

2. Environmental Accounting
3. Accounting for Natural Resources and the Ecosystem
4. Including the Environment in Economics and Accounting
5. Valuation of the Environment
6. Accounting Views of Environmental Costs Caused and Borne
7. Actual and Imputed Environmental Costs

Physical and Monetary Environmental Accounting **128**

Ichiro Kaneda, *Niigata Sangyo University, Japan*

1. Treatment of Environmental Elements in the System of National Accounts and the System of Integrated Environmental and Economic Accounting
2. Environmental Costs Caused, Costs Borne, Actual Costs, and Imputed Costs
3. Importance of Introducing Environmental Physical Data into Accounting
4. The Concept of Material/Energy Balance
5. Changes in Natural Assets
6. Natural Resource Accounts
7. Physical Accounts
8. The System of Integrated Environmental and Economic Accounting Matrix

Environmental Accounting by Satellite Accounting **148**

Ichiro Kaneda, *Niigata Sangyo University, Japan*

1. Satellite Accounting for Sustainable Development
2. The Development of Environmental Accounting
3. Handbook of National Accounting To Be the Standard
4. The Necessity for Two Data Systems
5. The Structure of the Satellite Accounting System
6. Limitations of the System of Integrated Environmental and Economic Accounting
7. The Physical and Monetary Data Systems
8. The Versions of the System of Integrated Environmental and Economic Accounting
9. The Matrix Tables of the System of Integrated Environmental and Economic Accounting

Integrated National and Environmental Economic Accounting **167**

Ichiro Kaneda, *Niigata Sangyo University, Japan*

1. Environmental Elements and Accounting in System of National Accounts
2. The Utility of Natural Assets
3. The Environment in the System of National Accounts
4. Recent Developments in the System of National Accounts
5. The System of National Accounts and the System of Integrated Environmental and Economic Accounting
6. Environmental Accounting and the System of Integrated Environmental and Economic Accounting
7. Accounting for the Natural Environment
8. Early, Reasonable Economic Treatment and Input-Output Analysis

Environmental Globalism and Green Consumers **189**

Ichiro Kaneda, *Niigata Sangyo University, Japan*

1. Green Consumerism and Major International Conferences
2. Awareness of the Relationship between Consumption and the Environment
3. Lessening Atmospheric Carbon Dioxide
4. Forests and Carbon Dioxide
5. Carbon Dioxide as an Indicator of Global Environmental Difficulties

6. Environmental Accounting
7. Identifying the Origin and Destination of Carbon Dioxide
8. The Importance of Households and Individuals
9. Green Consumerism in Economic and Material Terms
10. Consumer Behavior
11. The Concept of the Regional and Global Community

Ecobusiness Management and Globalization of Ecobusiness

209

Ichiro Kaneda, *Niigata Sangyo University, Japan*

1. Ecobusiness and the Behavior of Consumers and Producers
2. Regulations and Taxation
3. The Effect of Consumers' Demands on Enterprises
4. Ecobusiness and Administration
5. Administration and Environmental Accounting Systems
6. The Valuation of Economically External Environmental Elements
7. Ecobusiness, Life Cycle Assessment, and International Standards

Need for Ecoenterprise and Ecotechnologies

223

Ichiro Kaneda, *Niigata Sangyo University, Japan*

1. The Development of Ecoenterprise and Ecotechnology
2. Ecobusiness Management
3. Social Demand for Environmental Protection Services and Goods
4. New Demand for Ecoenterprise
5. Five Categories of Ecoenterprise
6. Residual-Reducing Industries
7. Reuse and Recycling of Residuals
8. Treatment of Residuals
9. Recycling and the Natural Environmental Recycling System

Environmental Values and Ethics

235

Mouchang Yu, *Institute of Philosophical Studies, Chinese Academy of Social Sciences(CASS), China*
 Yi Lei, *Institute of Science, Technology and Society, Tsinghua University, China*

1. Introduction
2. Nature's Part in the Creation of Civilization
3. The Environment's Contribution to Civilization
4. Civilization's Damage to the Environment
5. Conclusion

Ethical Dimensions of the Environmental Crisis

240

Mouchang Yu, *Institute of Philosophical Studies, Chinese Academy of Social Sciences(CASS), China*
 Yi Lei, *Institute of Science, Technology and Society, Tsinghua University, China*

1. Ethical challenges of the Environmental Crisis
 - 1.1. Albert Schweitzer: The Environmental Crisis Is a Cultural Crisis
 - 1.2. Aldo Leopold: In Need of Changes of Economic Value Measures
 - 1.3. Holmes Rolston: To Establish a Theory of Natural Values
2. Environmental Ethics Is the Ethics of Sustainable Living
 - 2.1. Fundamental Principles of Environmental Ethics

Anthropocentric Ethical Theories: Relations with Non-Human Beings 247
 Mouchang Yu, *Institute of Philosophical Studies, Chinese Academy of Social Sciences(CASS), China*
 Yi Lei, *Institute of Science, Technology and Society, Tsinghua University, China*

1. Is Anthropocentrism the Cause of the Environmental Crisis?
2. Anthropocentric Environmental Ethics
3. Pan-moralism: Moral Relations with Nonhuman Beings

Biocentric Ethical Theories 253
 Mouchang Yu, *Institute of Philosophical Studies, Chinese Academy of Social Sciences (CASS), China*
 Yi Lei, *Institute of Science, Technology and Society, Tsinghua University, China*

1. Albert Schweitzer: Reverence for Life
2. Peter Singer: Respect for Sentience
3. Paul Taylor: Biocentric Ethics
4. Ecocentric Ethics
5. Modern Environmental Ethics Converge

Deep Ecology: from Duty to Ecological Consciousness 262
 Mouchang Yu, *Institute of Philosophical Studies, Chinese Academy of Social Sciences (CASS), China*
 Yi Lei, *Institute of Science, Technology and Society, Tsinghua University, China*

1. Deep Ecology: The Philosophical Foundation of Deep Environmental Ethics
 - 1.1. What Is Deep Ecology?
 - 1.2. The Basic Principles of Deep Ecology
 - 1.3. The Platform of Deep Ecology
2. From Duty to Ecological Consciousness
 - 2.1. The Properties of Ecological Consciousness
 - 2.2. Ecological Consciousness: From Shallow to Deep
 - 2.3. Deep Ecological Consciousness: An Ethics Supporting Sustainable Development

Ecofeminism: Intra-Generational and Intergenerational Equity 270
 Mouchang Yu, *Institute of Philosophical Studies, Chinese Academy of Social Sciences (CASS), China*
 Yi Lei, *Institute of Science, Technology and Society, Tsinghua University, China*

1. Ecofeminism: A Major Aspect of Anti-Mainstream Culture
 - 1.1. From Feminism to Ecofeminism
 - 1.2. The Main Schools of Ecofeminism
 - 1.2.1. Cultural Ecofeminism
 - 1.2.2. Social Ecofeminism
 - 1.2.3. Philosophical Ecofeminism
2. Intra-generational and Intergenerational Equity
 - 2.1. The Principle of Equality
 - 2.2. The Principle of Intra-generational Equity
 - 2.3. From Intra-generational Equity to Intergenerational Equity

Other Important Future Environmental Issues 277
 Teng Teng, *Chinese Academy of Social Sciences, China*
 Yiduan Wang, *Beijing Technology & Business University, China*

1. An Efficiency Issue
2. Strengthening State Legislation and Improving the Legal System Relating to the Environment
 - 2.1. Review of Environmental Legislation
 - 2.2. China's Environmental Legislation
 - 2.2.1. Statutory Framework
 - 2.2.2. Fundamental Principles

3. The Organizational and Coordinating Role of the United Nations and International Legal Instruments Environmental Protection
4. Management by Local Administrative Authorities
 - 4.1. Management of the Urban Ecological Environment
 - 4.2. Management of the Rural Ecological Environment

Efficiency **302**
 Qing Teng, *Beijing Language and Culture University, China*

1. Eco-efficiency
2. Economic Efficiency
3. Efficiency and Equity
4. Market Failure and Government Failure

Local, National, Regional, and Global Links in Ecological Environmental Management **312**
 Qing Teng, *Beijing Language and Culture University, China*

1. State Governments Are Subject to Ecological Environment Management
 - 1.1. Special Exception 1: The Malaysian Experience in Sewage Management
 - 1.2. Special Exception 2: Japan's Security–Return System in Solid Wastes Recycling
 - 1.3. Special Exception 3: Costa Rica's Forest Felling Tax, Afforestation Security, and Service Fee
 - 1.4. Special Exception 4: The Influence of Energy Taxes and Subsidies on Economy and Environment
2. State Ecological Environment and International Cooperation
3. State Management of the Ecological Environment and Regional Economic Cooperation
4. State Management of the Ecological Environment and the Role of Local Government

The Urbanizing World **325**
 J. Shen, *Department of Geography and Resource Management, The Chinese University of Hong Kong, China*

1. Introduction
2. Urbanization Process
3. Urban Population Growth and Concentration
4. Urbanization in Developing Countries
5. Sustainable Cities and Urban Future
6. Conclusion

Environment And Development - Overall Recommendations And Conclusions **342**
 Teng Teng, *Chinese Academy of Social Sciences, China*

1. Introduction
2. The World Today
3. Future Sustainable Development
4. International Coordination and the United Nations
5. Preventing Wars and Natural Disasters
6. Developing Countries
7. Consumption, Production, and Lifestyles of the Rich Developed Nations
8. Scientific, Technological, and Financial Aid to Developing Countries

Index **353**

About EOLSS **363**
